EXECUTIVE SUMMARY

AI tourism workflow infrastructure, not a basic taxi website

Sky AI TravelTech is an early-stage AI tourism infrastructure platform combining AI itinerary generation, route intelligence, tourism SEO architecture, mobile-first UX, and WhatsApp inquiry conversion.

The platform is positioned as AI-powered tourism workflow infrastructure: a system that helps travelers plan routes, structure itineraries, and move toward clearer private-driver and tour inquiries.

LIVE PLATFORM INFRASTRUCTURE

Production systems available for buyer review

**Main tourism platform**

<https://skytaxisrilanka.com>

Production deployment for the live tourism website, mobile-ready UX, SEO infrastructure, and real tourism business integration.

**AI planning platform**

<https://ai.skytaxisrilanka.com>

Live AI planning infrastructure for itinerary generation, route-aware planning, and tourism inquiry preparation.

PLATFORM ASSETS

Core assets included in the acquisition package

Main tourism website

AI itinerary planner

Route intelligence logic

WhatsApp conversion flow

SEO architecture

Mobile-first UI

Vercel deployment

Brand/domain assets

AI SYSTEM

Structured itinerary intelligence for tourism planning

The AI planner is built around practical Sri Lanka travel workflows: route order, pacing, traveler preferences, itinerary summaries, and inquiry-ready output.

- GPT-powered itinerary generation
- Tourism-specific prompt architecture
- Route optimization logic
- Travel pacing logic
- Mood/vibe itinerary intelligence
- Food/cafe recommendation logic
- Stay-area recommendations
- WhatsApp itinerary summaries

DEFENSIBILITY

Why this platform is difficult to replicate

The platform combines tourism workflow design, AI itinerary logic, conversion-focused UX, and scalable SEO infrastructure into a unified tourism intelligence system.

**Tourism workflow architecture**

Custom tourism planning flows built specifically for Sri Lanka travel behavior, transportation logic, and route sequencing.

**AI itinerary intelligence**

Structured AI prompt systems for itinerary generation, travel pacing, and tourism recommendation logic.

**SEO clustering system**

Route-aware tourism SEO architecture designed for scalable destination and travel-intent expansion.

**WhatsApp conversion funnel**

Integrated tourism inquiry workflows designed to convert travel intent into private-driver and tour leads.

**Production-ready deployment**

Live deployment architecture already configured with responsive UI systems and scalable frontend infrastructure.

**Tourism-specific UX**

User experience designed specifically around real traveler planning behavior instead of generic chatbot interactions.

SEO & ACQUISITION INFRASTRUCTURE

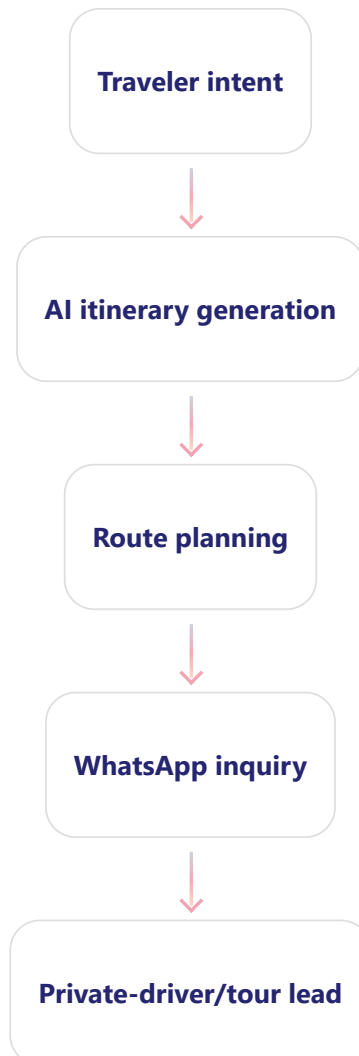

Route-based search architecture for tourism intent

The SEO layer is organized around destination movement, airport transfers, route pages, topical authority, and structured discovery paths.

- **Route-based tourism SEO**
- **Schema systems**
- **Topical authority**
- **Google Search Console / Analytics readiness**
- **Destination page architecture**
- **Internal linking**
- **Sitemap and robots setup**

CONVERSION FUNNEL

From traveler intent to private-driver lead

**WHAT IS INCLUDED**

Transfer package components

The acquisition package is intended to include the product, code, deployment setup, brand assets, and workflow logic.

- Domain
- AI planner
- Backend/API code
- OpenRouteService integration
- Branding assets
- Tourism workflow logic
- Main website
- Frontend source code
- OpenAI integration setup
- Deployment configuration
- Prompt architecture
- Documentation

TECHNICAL STACK

Modern, transferable infrastructure

Solo Technical Founder

OPERATIONAL
TOURISM BUSINESS

SKY Taxi Service & Tours Sri Lanka

BUSINESS
OPERATIONS
CONTACT

Dasun Punsiri

CONTACT EMAIL

dasunpunsiri@gmail.com

Built and architected independently by Dihen Dewhan as a solo technical founder focused on AI-powered tourism infrastructure, route intelligence, and scalable travel workflows.

Operational tourism contact infrastructure is supported through an active Sri Lanka taxi service business operated under existing tourism operations.

CURRENT STAGE

Early-stage, deployed, and built for expansion

**EARLY-STAGE AI TRAVELTECH
INFRASTRUCTURE**

- Early-stage
- Live website
- Traffic and SEO are still early
- No fake revenue or fake traction claims
- Production deployed
- Live AI planner
- Built for scalable expansion

BUYER FIT

Who this acquisition is best suited for

The platform is positioned for operators, founders, and businesses looking to accelerate tourism-tech deployment, SEO growth, and AI-assisted travel infrastructure.

**TravelTech startups**

A fast path to Sri Lanka-focused AI planning infrastructure without starting from a blank product surface.

**Tourism companies**

Useful for operators that want a stronger digital funnel around airport transfers, private drivers, and custom tours.

**SEO operators**

A route and destination content structure that can be expanded into broader tourism search demand.

**AI product studios**

A live vertical AI workflow system with practical travel logic rather than a generic chatbot wrapper.

**Lead-generation businesses**

A tourism-intent funnel designed to turn planning activity into quote-ready WhatsApp inquiries.

**Micro private equity buyers**

An early-stage digital asset with product, brand, deployment, and expansion paths already organized.

**Tourism SaaS founders**

A focused foundation for building itinerary exports, CRM features, driver workflows, or white-label travel tools.

**Regional travel operators**

A model that can be adapted beyond Sri Lanka into nearby tourism markets with similar route-planning needs.
